

## Scales and Conversions - $\mathcal{A}$

Two maps are drawn of a play park and a garage using the $S$ cale 1:200 and 1:50
$\mathcal{H e r e}$ are some measurements and reallife sizes of objects on the plans. $\mathcal{F i l l}$ in the boxes to comple te the table:

Scale 1:200 (every 1 cm on map $=200 \mathrm{~cm}$ in real life size)

|  | DRAWING SIZE | REAL LI FE SIZE |
| :--- | :--- | :--- |
| Slide | 1.7 cm |  |
| Table | 0.8 cm |  |
| Bench |  | 1.2 m |
| Flower bed | 1.1 cm |  |
| Youtf clu6 6uilding | 7.5 cm | 8.9 m |
| Foot6alf pitcf |  |  |
| Soft play area | 4.2 cm | 12 m |
| Running track |  |  |
| Swings | 1.4 cm |  |
| Roundabout | 2.3 cm |  |

Scale 1:50 (every 1 cm on plan $=50 \mathrm{~cm}$ in real life size)

| OBIECT | DRAWING SIZE | REAL LIFESIZE |
| :--- | :--- | :--- |
| Car ramp 1 | 5.7 cm |  |
| Office | 15 cm |  |
| Work Bencf |  | 1.2 m |
| Car ramp 2 | 1.1 cm |  |
| Tyre Area | 6.5 cm |  |
| MOT Area |  | 5.9 m |

## Scales and Conversions - $\mathcal{B}$

1. A map scale is $1: 1500$

If the distance on the map is 500 cm , what is the actual distance?
2.

$\mathcal{A}-\mathcal{B}$ measures 16 cm and the scale is $4: 4000$.
What is the totallength in metres?
3. A man walks 1500 metres.

On a map this is shown as 3 cm .
What is the scale on the map?
4. The flowing distances were recorded for a sponsored walk:

What is the total distance walked in Kilometres?

## Scales and Conversions

## $\mathfrak{A n s w e r s} \mathcal{A}$

| $(1: 200)$ | DRAWINGSIZE | REAL LI FE SIZE |
| :--- | :--- | :--- |
| Slide | 1.7 cm | $340 \mathrm{~cm}(3.4 \mathrm{~m})$ |
| Table | 0.8 cm | $160 \mathrm{~cm}(1.6 \mathrm{~m})$ |
| Bench | 0.6 cm | 1.2 m |
| Flower bed | 1.1 cm | $220 \mathrm{~cm}(2.2 \mathrm{~m})$ |
| Youtf club building | 7.5 cm | $1500 \mathrm{~cm}(15 \mathrm{~m})$ |
| Foot6all pitch | 4.45 cm | 8.9 m |
| Soft play area | 4.2 cm | $840 \mathrm{~cm}(8.4 \mathrm{~m})$ |
| Running track | 6 cm | 12 m |
| S wings | 1.4 cm | $280 \mathrm{~cm}(2.8 \mathrm{~m})$ |
| Roundabout | 2.3 cm | $460 \mathrm{~cm}(4.6 \mathrm{~m})$ |

| (1:50) | $\mathcal{D R A W I N}$ | REAL LIFE S IZE |
| :---: | :---: | :---: |
| Car ramp 1 | 5.7 cm | 285 cm ( 2.85 m ) |
| Office | 15 cm | $750 \mathrm{~cm}(7.5 \mathrm{~m})$ |
| Work $\mathcal{B e n c h}$ | 2.4 cm | 1.2 m |
| Car ramp 2 | 1.1 cm | $55 \mathrm{~cm}(0.55 \mathrm{~m})$ |
| Tyre Area | 6.5 cm | 325 cm ( 3.25 m ) |
| MOT Area | 11.8 cm | 5.9 m |

## Answers $\mathcal{B}$

1. $500 \mathrm{~cm} \chi 1500=750000 \mathrm{~m}=7500 \mathrm{~m}=7.5 \mathrm{~km}$
2. $4: 4000=1: 1000$
$16 \mathrm{~cm} \times 1000=16000 \mathrm{~cm}=160 \mathrm{~m}$
3. 3 cm represents 1500 m

So 1cm represents 500 m (or 1cm represents 50000 cm )
So scale of map $=1: 50000$
4. Total distance $=2200 \mathrm{~m}+1600 \mathrm{~m}+1400 \mathrm{~m}+2900 \mathrm{~m}+2400 \mathrm{~m}=10500 \mathrm{~m}$ $10500 \mathrm{~m}=10.5 \mathrm{~km}$
